Mrs. Emily H. Womach
Executive Department
Office of the Governor
Dover, Delaware 19901

Dear Mrs. Womach:

The State Board of Health and New Castle County are seeking to close the Llangollen Dump within the shortest possible time. A new County disposal site has been located near Tybouts Corner and is expected to receive approval from the Board of Health at its December 12 meeting. The Tybouts Corner site will be operated, from the start, in accordance with strict sanitary landfill standards developed by the Board of Health which will eliminate future dump associated problems.

The New Castle County Department of Public Works recently has been given responsibility for land disposal site operation. They have been instructed verbally and in writing concerning the strict landfill standards which must be met. The County Engineer has been supplied, also, with our requirements for the proper closing of the Llangollen Dump, including two feet of compacted final cover over all fill areas. A complete rodent elimination program at Llangollen Dump will begin next week in accordance with rodent control procedures supplied by the Board of Health.

Respectfully yours,

Floyd I. Hudson, M.D.
Executive Secretary
